

OVERVIEW

Bitbook is an online sportsbook and casino, operating on blockchain basis with cryptocurrencies and a dedicated BXK token. The platform is looking to reinvent the way bets are placed online by providing unique solutions that cannot be offered by traditional online gambling and betting systems.

While other ICOs in the industry are trying to raise funds to develop their platforms from scratch, we at Bitbook have already developed and successfully launched our product. Both the sportsbook and the casino games are currently live and functioning - at present, players can use Bitcoin to participate in the games or to place a bet.

Bitbook also works with BTC and ETH, so you do not have to purchase BXK tokens in order to play on the platform. However, BXK holders get exclusive prices, such as 25% discount on all games and betting options, special bonuses such as free lotteries and 10% cashback on all of their losses, which are paid back directly on their accounts at the end of each month!

In the future, Bitbook plans to repay the community by buying out all of the BXK tokens from the exchanges and burning them. This way, current token holders will have the potential to be rewarded with high returns on their tokens due to the reduced supply of BXK tokens on the market.

The Bitbook platform will offer its players a variety of games and betting options through the Bitbook Sportsbook, slot machines and card games. The Casino has 200+ games of different kind - over 150 slot games and 9 different variations of roulette.

The Bitbook casino games are licensed through known online casino providers such as Betsoft, Bgaming and Isoftbet, who have all verified their algorithms through trustworthy authorities in the online gambling industry.
